### Macro developments

- India's eight core output contracted to a 6-month low of 4.6% in Feb'21 from an increase of 0.9% in Jan'21. This was led by across the board decline in output, with double digit contraction registered in refinery output at 10.9% in Feb'21. On FYTD basis, output dropped by 8.3% in Apr-Feb'21 from an increase of 1.3% last year. With this, IIP too is expected to be lower than anticipated in Feb'21.
- India's fiscal deficit for the centre (12MMA basis) rose to 6.7% in Feb'21 from 6.1% in Jan'21. This is on account of higher spending in Q4. Between Jan-Feb'21, overall spending has increased by 51.2% (YoY) compared with 28.9% increase in Q3. While capex has maintained momentum in Q3 and Q4, revenue spending is also gathering pace now. At the same time, revenue receipts have eased in Q4 (24.6%) compared with Q3 (62.8%).
- Japan's industrial production fell by 2.1% on MoM basis in Feb'21 (est.: 1.3% decline) versus 4.3% rise in Jan'21. Output was impacted by both earthquake and pandemic related restrictions. Decline was led by motor vehicles, electrical machinery and I&C equipment. Government expects production to have dropped further in Mar'21 by 1.9%.
