

## MACRO DAILY

21 June 2021

### Macro developments

- India's forex reserves rose by US\$ 3.1bn to a new record high of US\$ 608.1bn in the week ended 11 Jun 2021. With this, India is now the fourth largest accumulator of forex reserves after China, Japan and Switzerland. In FYTD22, India's forex reserves have risen by US\$ 28.8bn versus US\$ 32.1bn in the same period last year. Import cover stands at 15months.
- Retail sales in Australia rose less than expected by 0.1% in May'21, on a MoM basis (est.: 0.4%) and against 1.1% increase in Apr'21. This was on account of lockdown restrictions in the country's second most populous state of Victoria, thus hurting demand. The moderation was led by fall in household goods, clothing, footwear and personal accessories retailing.
- South Korea's exports rose by 29.5% during 1-20 Jun 2021, versus 45.6% jump in May'21. Less favorable base is key reason for easing growth. However, when adjusted for calendar effects, daily shipments rose by 33.7% in 1-20 Jun. The growth is led by cars (62.2%), oil products (58.6%) and wireless communication (15.8%). Exports to US (41.3%) and EU (48.8%) rose the most, while those to China rose at a slower pace (7.9%).
