25 June 2021

Macro developments

- India's economic activity is beginning to rebound as seen in the trend of e-way bills and fuel consumption in Jun'21. On MoM basis, e-way bills generated till 20 Jun 2021 rose to 33.7mn (+21%) compared with 28.3mn in the same period in May'21 (-21%). Fuel demand also posted first MoM increase since Mar'21 during 1-15 Jun 2021. News reports indicate that petrol sales rose by 13% while diesel consumption was up by 12% versus 17% decline in whole of May'21.
- US GDP in Q1CY21 rose by 6.4%, unchanged from its previous estimate and against 4.3% growth seen in Q4CY20. The upward revisions to nonresidential fixed investment, private inventory investment, and exports were offset by an upward revision to imports. Separately, durable goods orders rose by 2.3% (est.: 3%) from 0.8% decline in Apr'21. However, core capital goods orders fell by 0.1% from 2.7% increase in Apr'21. US jobless claims on the other hand, fell by 7000 to 411,000 for the week ending 19 Jun 2021.
- Bank of England (BoE) in its policy meet unanimously voted to keep the policy rate on hold at 0.1% and also voted (8-1) to continue with its bond purchase program (US\$1.2 tn) till the end of the year. It stated that the inflation is likely to spike to 3% in the coming months along with strong GDP growth. However, this spike in inflation is likely to be transitory and will fade over time with inflation returning back to its target of 2% in medium term.
