26 August 2021

Macro developments

- RBI reported that currency in circulation (CIC) declined by Rs 64bn and stood at Rs 29.5tn for the week ending 20 Aug 2021. Reserve money rose by 16.7% on a YoY basis, compared with 15% last year. On FYTD basis, reserve money increased by 3.5% against 5.4% increase, a year ago.
- US durable goods orders fell by 0.1% in Jul'21 (est. -0.3%) compared with an increase of 0.8% in Jun'21 on a MoM basis. This was led by a 2.2% decline in transport equipment versus an increase of 1.4% in Jun'21. Orders for core capital goods was flat (0%) in Jul'21 (est. 0.5%) following an increase of 1% in Jun'21. This was attributed to supply chain bottlenecks and shift in demand towards services.
- Central Bank of Korea (BoK) increased its policy rate by 25bps to 0.75% in its latest meeting, a first in nearly 3 years. It informed that the decision was not unanimous and some members argued to keep rates steady in view of rising Covid-19 cases. However, rising inflation, surge in home prices and household debt, necessitated the increase in policy rate. While inflation forecast was revised upward to 2.1% (2% target of the Central Bank), growth forecast was left unchanged at 4% for CY21.
