Macro developments

- India's GST collections for Jul'21 remained broadly steady at Rs 1.1tn versus Rs 1.2tn in Jun'21. Adjusted CGST rose to Rs 479bn in Jul'21 from Rs 337bn in Jun'21, while adjusted SGST eased from Rs 696bn in Jun'21 to Rs 601bn in Jul'21. On FYTD basis (Apr-Jul), total collections are at Rs 4.2tn versus Rs 3.3tn in FYTD21 and Rs 4tn in FYTD20 (pre-pandemic). Current monthly run rate is also higher at Rs 1.1tn versus Rs 1tn in FYTD20.
- India's manufacturing PMI expanded at a much slower pace of 52.3 in Aug'21 from 55.3 in Jul'21, signalling 'signs of weakness due to pandemic'. New orders expanded for the 2nd straight month at a much softer pace. Manufacturer's cost burden have risen for 13th straight month on account of supply side bottlenecks (scarcity of raw material and transportation). While the 1-year outlook for production remained positive, confidence level has faded.
- Global manufacturing PMI index eased to 54.1 in Aug'21 from 55.4 in Jul'21 as activity slowed in 24 out of 31 countries surveyed. Eurozone PMI slipped to 6-month low of 61.4 in Aug'21 from 62.8 in Jun'21 owing to severe supply constraints. However, new orders continued to improve for the 14th consecutive month, leading to sharp rise in backlog of orders. Elevated input prices also led to increase in selling prices. Separately, US ISM manufacturing index rose to 59.9 from 59.5 as new orders and production inched up, while employment fell.
