### Macro developments

- India and EU are expected to strengthen economic ties and cooperation in dealing with Covid-19 crisis in their upcoming meeting. Earlier, EU had already announced a € 2.2mn emergency funding to India to tackle the current crisis. Negotiations towards FTA on trade and investment promotion are likely to be discussed. EU is an important trading partner to India accounting for 19.5% of India's exports and 15% of imports.
- Bank of England (BoE) in its latest policy kept benchmark rate unchanged at 0.1%. However, it slowed down its pace of asset purchase from £ 4.4bn/week to £ 3.4bn/week. This was on the back of revival in economic activity for which GDP projection has been revised upward to 7.25% in CY21 from 5% estimated earlier. Earlier, Bank of Canada has signaled on raising rates and trimming asset purchase program on the back of recovery.
- China's export growth rose to 32.3% in Apr'21 (est. 24.5%) from 30.6% in Mar'21, rising for the 10th consecutive month. This was led by improvement in global demand particularly from advanced economies. Imports rose by 43.1% in Apr'21, registering the fastest pace of increase since Jan'11 and compared with 38.1% in Mar'21. Higher commodity prices and improvement in domestic economy boosted imports.
