Global market is eyeing US-Japan tariff talks, anticipating some forthcoming negotiations. This holds crucial as it paves a way for further negotiations with other major trading partner of the US. Separately, Fed Chair raised flags of unemployment and inflation deflecting from Fed's goals in the near term on account of ongoing tariff turmoil. This again led to some repricing of risks. Hence, Gold continued its record rally, US treasuries (10Y yield) continued to decline. Other central banks such as Bank of Korea and Bank of Canada held policy rates unchanged, being watchful of how trade policy takes shape. On macro front, US retail sales data remained in line, while industrial production softened. In UK, inflation softened while core held ground. In Japan, exports moderated at a sharp pace. On domestic front, merchandise trade deficit expanded led by pickup in gold imports.

- Global indices ended mixed. US indices ended in red as investors monitored comments by US Fed Chair on risks to growth and higher prices due to tariffs. Technology stocks declined the most. The CBOE volatility index used as 'fear gauge' inched up. Sensex closed higher with gains in banking stocks. However, it is trading lower today while other Asian stocks are trading higher.

- Global currencies ended higher. DXY slid as investors remained wary of slowing growth in the US. Yen surged to a multi month high amidst tariff uncertainty and greater demand for safe-haven assets. INR strengthened supported by FII inflow. It is trading further stronger today, in line with other Asian currencies.

- Japan's 10Y yield underwent sharp downward correction. This is on the wake of BoJ officials repeatedly hinting at caution surrounding rising risks to protectionist measures. In the US as well, 10Y yield fell sharply as rising risks to downward pressure on growth builds up. India's 10Y yield softened by 2bps as inflation print supported deeper rate cuts by RBI. It is trading at 6.38% today.
