

## MORNING MOCHA

FOMC minutes reflected that members were split on further course of policy. While a number of members believed that further rate increases may not be needed, some believed that persistently high inflation may require further policy tightening.

Members generally agreed that risks to inflation remained tilted to the upside. On the other hand, tightening credit conditions due to bank failures remained a key risk to growth. Impasse over US debt ceiling talks continued, which weighed on investor sentiments. Elsewhere, CPI inflation in UK moderated less than expected to 8.7% (est. 8.2%) from 10.1% in Mar'23, as core inflation rose to a 31-year high. In Germany, Ifo's business climate index dipped to 91.7 in May'23 from 93.0 in Apr'23, led by a decline in future expectations.

- Global indices closed lower. Investors remained cautious tracking Fed minutes which had an uncertain tone. Governor Waller in his recent statement also cautioned against inflation. Elsewhere, Fitch's concern about progress in debt talks in the US and its impact on country's rating, also influenced sentiments. FTSE and Hang Seng fell the most. Sensex fell by 0.3%, led by a fall in metal stocks. It is trading further lower today, while Asian stocks are trading mixed.
