Global risk sentiment improved on reports that US President is likely to rollback tariffs on certain Chinese imports to check surging inflation. Global stocks and bond yields were mostly higher. Services activity in China picked up sharply in Jun'22 (PMI at 54.5 versus 41.4 in May'22). Services PMI in Japan also showed improvement. In India, trade deficit touched a new record high of US\$ 25.6bn in Jun'22, putting further pressure on the country's external position. As a result, INR is trading at a new record-low of 79.05/\$ today.

- Except Hang Seng (lower), global markets ended higher. Investors remained watchful ahead of US Fed minutes and BoE's Financial Stability Report, scheduled to be released this week. Gains in European markets were led by oil and gas stocks. Markets also await ECB officials' comments on rate and inflation in the current week. US markets were closed. Sensex also inched up by 0.6%, supported by banking and capital goods stocks. It is trading higher today in line with other Asian stocks.

- Except JPY (lower) and CNY (flat), other global currencies closed higher. EUR rose by 0.1% as elevated inflation print raised expectations of policy tightening by ECB. GBP too gained by 0.2% as investors assessed the possibility of bigger rate hikes by BoE. INR appreciated by 0.1% tracking gains in local equity market. However it is trading weaker today, in line with other Asian currencies.

- Except Japan (stable) and India (lower), global yields closed higher. Investors remained cautious tracking Eurozone PPI data, PMI print of Japan and China

and rate decision by RBA and Malaysia. India's 10Y yield fell by 5bps (7.37%) as government's introduction of special additional excise duty on exported crude oil products provided some breather on revenue loss, which might curtail additional market borrowings. However, it is trading higher at 7.41% today.
