## Europe/India region to continue growth momentum

- 1QFY26 results above estimates. gRevlimid contribution in 2QFY26 to be like 1QFY26; H2FY26 will likely be negligible
- Likely to launch Semaglutide in Canada in Jan'26; expects to launch in 87 countries internationally. Canada, Brazil, India key regions
- Amidst gRevlimid patent expiry,25% EBITDA margin sustainable.
   Maintain HOLD, rollover to June'27, allot 21x PE in line with 5Y average

**Result above expectation –** Sales/EBITDA/PAT was 4%/7%/7% above our estimates. Geographically, North America sales declined 11% due to price erosion in gRevlimid, domestic sales grew11% surpassing IPM growth and Europe grew by 142% driven by NRT sales. Despite price erosion in Revlimid, gross margin increased to 56.9% and EBITDA margin was reported to be 25.2%, driven by lower R&D cost contribution.

India region to continue surpassing IPM growth: Domestic sales grew by 11%, driven by new launches and pricing growth. DRRD has 10,000 MRs spread across 50 teams. During the quarter, DRRD launched 5 new brands including 2 innovative assets, Beyfortus (RSV Vaccine) & Sensimmune (Acarizex slit). Going forward, the focus in on continuing to surpass the IPM growth, with a higher focus on innovation and inorganic activity. Hence, we expect the domestic region to grow at 10% CAGR from FY26-28.

**Double-digit growth to continue in Europe region:** Ex-NRT sales, Europe sales grew by 15% YoY, driven by new product launches. During the quarter, 13 new products were launched, and the momentum is likely to continue in biosimilars, too, with the launch of Rituximab, Bevacizumab, followed by Denosumab and Abatacept. We expect the Europe region to grow at 15% CAGR from FY26-28E.

**R&D cost rationalisation to sustain current EBITDA margin:** R&D cost contribution lowered to 7.3% from the earlier 8-8.5%. Going forward, product mix is expected to be lower with intense price erosion in gRevlimid whose impact will be mitigated with a lower R&D cost contribution of 7-7.5%.

**Maintain HOLD:** We build in optimism on the Semaglutide and Abatacept launches in FY28, arriving at sales/EBITDA/PAT CAGR of 4%/7%/8% over FY26-28E; thereby maintaining HOLD. We roll forward our valuation to Jun'27, ascribing a PE of 21 in line with its 5Y historic PE (from the earlier18x) to arrive at TP of Rs 1,382 (earlier Rs 1,248). 24 July 2025

# **Earnings Call Highlights**

### Guidance

Expect R&D investments to be in the 7%-7.5% range of sales.

SG&A expenses guided to be in the 28-29% range of sales.

Normalised ETR to remain around 25% for FY25.

Base business guided to be in single digit for FY26, depending upon the success in product launches.

India and Europe business to grow in double digits.

## North America

**Sales-generated** revenue for the quarter was \$400 mn — a 17%YoY decline and 4% decrease sequentially. The softness in the market was primarily due to price erosion in selected products, primarily gRevlimid, as well as the procurement timing of this product by certain customers.

**Revlimid** - sales in Q2FY26 will likely be similar to Q1FY26, with further decline in Q3FY26. Q4FY26 is expected to have remaining or no sales.

**Abatacept** – Biosimilar Abatacept Phase III readout is expected in Nov'25, with BLA submission planned thereafter. Management believes that post Nov'25, the company will not pay for the clinical trials for Abatacept, which will lead to discretionary cost saving between R&D & SG&A of 500-600bps.

### Semaglutide -

The company is prioritising Semaglutide launches in Canada (pending exclusivity expiry in Jan'26, with no patent risk) and expects launches in 87 international countries post-Mar'26 like India, China and Brazil.

Expected capacity of 12mn pens in FY27 (10mn in CY26 for Canada); management is confident of this being adequate to capture meaningful share in the early-entry markets.

### Europe

NRT business EBITDA margin at 25%.

Ex-NRT sales, base business sales expected to grow in double digits.

### India

The company is focusing on innovative brands and differentiated products over commodity generics.

Field force stands at roughly 10,000 MR's, spread across 50 teams, supporting both brand-building and reach.

## PSAI

Growth was driven by the launch of new API products and favourable forex, partially offset by lower pricing and softer demand. Performance was further supported by growth in the pharmaceutical services business.

Gross margin contracted to 13.2%, mainly due to reduced internal sales and associated accounting allocations rather than a structural weakness. Management expects margins to normalise in the coming quarters.

The CDMO business generated sales of USD 17-18mn in Q1FY26 and believed to achieve USD 100mn by FY26; expected to grow to USD 250-300mn by 2030.

## **Other Highlights**

- Operating working capital as on 30th Jun'25 was Rs 133.3bn.
- Capex spent was Rs 6.8bn.
- Free cashflow in Q1FY26 was Rs 4.5bn.
- Net cash as on Jun'25 was Rs 29.22bn.

PLI income for FY26 will be almost zero. Expect PLI income in FY27 & FY28.

- Net debt to EBITDA is 0.5x.
- Out-licensing income was Rs 1.2bn included in others segment.

## Valuation Methodology

DRRD reported earnings above our estimates on all fronts amidst price erosion in Revlimid, which was mitigated by the NRT-driven Europe growth. During the quarter, R&D expense was optimised, aiding in sustaining 25% EBITDA margin.

Going forward, R&D cost optimisation would continue as the larger R&D spend towards Abatacept is over, and expected with a positive read-out in Nov'25. The Europe region is expected to continue double-digit growth, driven by NRT sales. NRT EBITDA margin is likely to sustain at 25%.

Although there will be short-term margin headwinds in H2FY26 on no participation from gRevlimid and Semaglutide, with R&D cost optimisation, EBITDA margin will likely sustain 25%. We have introduced FY28 numbers building in optimism on the Semaglutide and Abatacept launches in FY28. Hence, we arrive at sales/EBITDA/PAT CAGR of 4%/7%/8% over FY26-28E, thereby maintaining HOLD. We roll forward our valuation to Jun'27, ascribing a PE of 21 in line with its 5Y historic PE (from the earlier 18x), building in optimism on the Semaglutide launch in Canda in the first wave, to arrive at TP of Rs 1,382 (earlier Rs 1,248).

## Key risks

Key upside/downside risks to our estimates:

- (a) Speedy resolution of regulatory issues in key manufacturing units.
- (b) Above-expected contribution from gRevlimid.
- (c) Faster new product launches in the North America region.

## Downside risks:

(a) Irregular flow of USFDA product approvals may lead to a bunching up of key launches for limited competition products.

- (b) Adverse USFDA observations on manufacturing plants.
- (c) Increasing pricing pressure.

## **DR REDDY'S LABS**

The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur. BOBCAPS does not provide tax advice to its clients, and all investors are strongly advised to consult with their tax advisers regarding any potential investment in certain transactions — including those involving futures, options, and other derivatives as well as non-investment-grade securities — that give rise to substantial risk and are not suitable for all investors. The material is based on information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied on as such. Opinions expressed are our current opinions as of the date appearing on this material only. We endeavour to update on a reasonable basis the information discussed in this material, but regulatory, compliance, or other reasons may prevent us from doing so.

We and our affiliates, officers, directors, and employees, including persons involved in the preparation or issuance of this material, may from time to time have "long" or "short" positions in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein and may from time to time add to or dispose of any such securities (or investment). We and our affiliates may assume an underwriting commitment in the securities of companies discussed in this document (or in related investments), may sell them to or buy them from customers on a principal basis, and may also perform or seek to perform investment banking or advisory services for or relating to these companies and may also be represented in the supervisory board or any other committee of these companies.

For the purpose of calculating whether BOBCAPS and its affiliates hold, beneficially own, or control, including the right to vote for directors, one per cent or more of the equity shares of the subject company, the holdings of the issuer of the research report is also included.

BOBCAPS and its non-US affiliates may, to the extent permissible under applicable laws, have acted on or used this research to the extent that it relates to non-US issuers, prior to or immediately following its publication. Foreign currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of or income derived from the investment. In addition, investors in securities such as ADRs, the value of which are influenced by foreign currencies, effectively assume currency risk. In addition, options involve risks and are not suitable for all investors. Please ensure that you have read and understood the Risk disclosure document before entering into any derivative transactions.
