Weakness persists despite signs of industry revival; SELL

- Q4 tractors' volume rose by 8% YoY (combined volume from JV partners), aided by industry growth, realisation stays flat with 1% fall
- Raw material cost escalation and flat realisation continue to keep pressure on margins, gross and EBITDA margins slip YoY
- We maintain our FY26/FY27 EBITDA estimates, revise EPS retain 20x
 P/E multiple and revise TP to Rs 2,658 (from Rs 2,533). Maintain SELL

Volume weakness persists: ESCORTS amalgamated Escorts Kubota India and Kubota Agricultural Machinery India with Escorts Kubota. The performance has been adjusted since FY24 to reflect the performance of the amalgamated entity. Q4FY25 revenue from operations grew 6.3% YoY (-17% QoQ) to Rs 24.4bn, as tractor volumes grew by ~8% YoY (-18% QoQ) to ~26.6k units (-18% QoQ). Net realisation/vehicle was down 1% YoY (+1% QoQ) to Rs 0.91mn.

Only AM delivered growth, CE declined: Agri Machinery (AM) segment revenue grew by 11.1% YoY in Q4FY25 as tractors' volume grew by 7.6%; while EBIT margin was flattish at 11.2% vs 11.3% in Q4FY24. Construction Equipment (CE) continued to drag down, falling 10.3%/12% YoY/QoQ. Volumes dropped by 12.2% YoY while EBIT margin down to 9.1% vs 11% in Q4FY24. Railway equipment (RE) segment was discontinued (revenue/PBIT +20.2%/76.1% YoY).

Margin contracts on elevated cost structure: Raw material cost (inventory adjusted) inflated by 7% YoY (-21% QoQ) at Rs 17bn (up 60 bps to 69.4 as % of sales). Gross margin was weak at ~30.6% vs 31.2% YoY, due to the elevated cost of JV companies. EBITDA margin was at 11.8% in Q3FY25, declining YoY from 12.4% (improved QoQ), following the impairment impact and Kubota's import costs that were impacted by currency depreciation.

Amalgamation approved by NCLT: The amalgamation of Escorts Kubota India and Kubota Agricultural Machinery India has been approved by the National Company Law Tribunal (NCLT) and was filed with ROC on 1 September 2024.

Maintain SELL: ESCORTS's tractor realisation continues to be under pressure YoY, due to intense competition and unfavourable regional mix. ESCORTS has also lost domestic market share to the competition. The amalgamation impact on margins due to higher cost structure will stay. We maintain our EBITDA for FY26E/FY27E, but revise our EPS marginally higher to factor in lower tax impact and Other income benefits. We retain our SELL rating with revised TP of Rs 2,658 (from Rs 2,533). Our target P/E stays at 20x – a marginal premium to the stock's LT mean.

Fig 1 – Earnings call highlights

Parameter	Q4FY25	Q3FY25	Our view
Domestic volumes	Domestic tractor volumes grew 6.0% YoY to 24.8k units, underperforming industry growth of 17.3% by 11.3%. ESCORTS underperformed the South and East regions on dealer legacy issues limiting capacity. Industry outlook for FY26 is positive; the industry likely to grow in high single digits. Plans to expand dealer network in South for the Farm trac product line, in East/West for the Power trac product line and in North/Central for Kubota	Management is looking at 14-15% growth in Q4FY25 and expects a healthy Q1FY26. ESCORTS' overall tractor volumes grew by 4.5% YoY against industry growth of 12.7% as major markets of ESCORTS (North and Central) grew by only 2.5%. Management expects domestic tractor growth for FY25 to be at 6-7%.	ESCORTS continues to lose market share consistently vs its larger peers (which have grown in volume) and will continue to face challenges. The company's steps to make its presence felt in the key growth region are in the right direction.
Exports	Export tractor volumes increased by 36.6% YoY to 1.8k units from 1.3k units in Q4FY24, outperforming industry export growth of 4.0%. Exports through the Kubota channel stood at ~72 % in Q4FY25. For FY25, the share stood at 40%. Mexico exports have begun via shared Kubota distributor and volumes are expected to show from Q1FY26. Kubota's strategy is to position India a global export hub for all range of tractors.	Tractor industry exported 22.1k tractors in Q3FY25 vs 21.3k/24.5k in Q3FY24/Q2FY25. ESCORTS' exports volume was 0.97k tractors in Q3FY25 vs 1.3k/1.2k tractors in Q3FY24/Q2FY25. Europe continues to be a major export market.	Formal amalgamation with Kubota will give ESCORTS a better foothold in export markets. YoY gain in volume against the industry direction adds comfort. However, its full impact will take another 4-6 quarters.
Margins	EBITDA margin was down to 11.8% by 66 bps YoY from 12.4%, but up 50bps QoQ from 11.3%. Margin pressure included ~Rs 0.3bn impairment charge and Kubota's import costs impacted by currency depreciation.	EBITDA margin was at 11.4% in Q3FY25, improving QoQ from 10.3%. However, it declined YoY from 12%. Margins were affected due to production swing, 0.5% commodity inflation and discounts that were slightly higher on account of festive quarter.	Margins will be impacted due to the elevated cost structure of JV companies amalgamated with Escorts Kubota in the near term. Further, as the company engines are not allowed on Kubota platform, import cost will continue to pinch margins. Hiving off of the RE business will also continue to impact the show.
Other segments	Total CE volumes declined by 12.2% YoY to 1.7k units YoY, underperforming the industry's 8% decline. ESCORTS has completed the BS5 transition and liquidated the old inventory. Full price recovery is expected by September 2025. New BHL platform targeting domestic and international market was showcased at the Bharat mobility. Plans to have premium Kubota engine versions are in pipeline. Sale of Railway Equipment Division (RED) was delayed from 1st May to 1st of June due to pending approvals. Order book of RED stood at Rs 9 bn by the end of Q4FY25.	Construction equipment volume at 1,989 machines was down 0.9% YoY; but grew by 42.7% QoQ. ESCORTS expects a temporary impact due to price escalation from the transition to BS-5 standards. The Railway Equipment Division (RED) business revenue for Q3FY25 was at Rs 2bn, a decline of 2.2%/5.1% YoY/QoQ. Board approved the sale/transfer of RED division on a slump sale basis on 23 October 2024. RED business profitability is shown separately as discontinued operations.	The performance of segments other than tractors will improve. CE segment performance is likely to improve given the government's thrust on infrastructure. Crane and in mini escalator market, the company is No. 2 player. However, back loaders and compactors are a a challenge due to growing export markets dominated by MNC companies and not a strong play for ESCORTS. However, hiving off the Railway Equipment business at below-par valuations will have an impact in

Parameter	Q4FY25	Q3FY25	Our view
Regulations	ESCORTS has successfully transitioned the product portfolio BS5 norms, while the residual stock has been rundown. Cost impact for customers transitioning from BS3 and BS4 will be 10% and 7% respectively. TREM IV norms, which were initially set to take effect from 1st April, are expected to be delayed with no official update.	During Q3FY25, ESCORTS launched a range of five new emission standard compliant products. Products moving from BS3 to BS5 will lead to a cost increase of 10% for customers, whereas products moving from BS4 to BS5 will lead to a 5-6% cost increase.	ESCORTS has a lower presence in the high-end tractor segment and will see limited pricing impact from new norms.
Capex	Management has earmarked Rs 3.5-4 bn as capex for FY26. Another Rs 4-4.5 bn is kept aside for the land acquisition in UP totaling to ~Rs 8bn for the whole year. Post-acquisition, the greenfield plant will take 24-36 months to operationalise, targeting late FY28 or FY29 for production.	Capacity utilisation of tractors was at 60% and that of construction equipment at 95%. Greenfield project delay from the UP government due to pending land acquisition from farmers.	Ongoing capex is likely to be commissioned by FY28/29. Any meaningful reflection on the volume is visible only post the availability of extra capacity.
Merger	The merger continues to drag margin by ~2% as Kubota's import cost and currency depreciation weighs in. Merger synergies likely to kick in, in a time of 2-3 years.	Management expects marginal improvement in margins next year over the current year and continues to work on cost reduction measures.	In the medium term, margins are likely to be under pressure. Clarity, particularly on exports business, is likely to emerge in the next two years, following a complete branding revamp.
Other Information	ESCORTS maintained a channel inventory of 4-5 weeks at the end of Q4FY25. Cash and cash equivalents were Rs 65-66 bn post-debt repayment of Rs 3.5 bn for merged	The board approved sale of land at Faridabad for consideration of Rs 1.10 bn to Sona Comstar. 	finance arm of the Rs 2 bn commitment. They are targeting a book size of Rs 1 bn by FY26-end and 30-35% penetration in 2-3 years.		Investment in the finance arm is at a nascent stage and will take atleast two years for the business to gain meaningful size.

Valuation Methodology

ESCORTS tractor realisation continues to be under pressure YoY, due to intense competition and unfavourable regional mix. ESCORTS has also lost domestic market share to the competition.

The amalgamation impact on margins due to higher cost structure will stay. Import substitution of Kubota engines due to the policy of not allowing Escorts engines (on Kubota platform) will be a drag. Margin impact will be ~1-2% in the medium term. Further, we believe the hiving-off impact of the remunerative Railway Equipment division will impact on the FY26/FY27 earnings trajectory. The combined impact is reflected in our earnings revisions for FY26/FY27. Full benefit of the Kubota integration on export sales is likely to flow in only after 12-24 months.

We maintain our EBITDA for FY26E/FY27E, but revise our EPS marginally higher to factor in lower tax impact and other income benefits. We retain our SELL rating with revised TP of Rs 2,658 (from Rs 2,533). Our target P/E stays at 20x - a marginal premium to the stock's LT mean.

Key risks

Key upside risks to our estimates:

- Faster-than-expected revival in domestic volumes in targeted regions
- Faster-than-anticipated margin revival owing to earnings-accretive price hikes
- Quicker easing of commodity prices than anticipated.
