HOLD TP: Rs 1,068 | ∀ 3%

TVS MOTOR

Strong quarter but positives in the price

- Q2 revenue at Rs 72bn (+29% YoY) backed by higher ASP (Rs 69.3k, +13%) and volumes (+14%)
- Healthy realisation gains on the back of premium bike sales and price hikes, keeping gross margin intact at ~24%
- Stock offers limited upside post recent run-up; we assume coverage with HOLD for a TP of Rs 1,068

**Robust topline:** TVSL's Q2FY23 net sales came in at Rs 72.2bn with net realisation per vehicle (NRPV) rising 13% YoY to Rs 69.3k and volumes up 14%. The strong uptick in volumes was largely contributed by the domestic two-wheeler segment that offset challenges in the export market. Realisation growth came from the high-end motorcycle segment.

**Margins stable:** Raw material inflation continued with a jump of 29% YoY on a high base, but management indicated that prices are nearly at their peak. Gross margin at 23.9% was flat YoY and QoQ. EBITDA grew 31% YoY to Rs 7.4bn and the operating margin held at 10.2% (10% in Q2FY22) despite higher marketing cost incurred on new launches ('Ronin' and 'i-Qube'). Adj. PAT rose 47% YoY to Rs 4.1bn, translating into a PAT margin of 5.5% (4.9% in Q2FY22).

**Healthy demand outlook:** The demand outlook remains robust as semiconductor supply chain concerns fade. Management is confident of the company's outperformance vis-à-vis the industry and indicated that its thrust on premiumisation will continue, led by high-end motorcycles such as 'Raider', 'Apache' and 'Ronin'. The company believes muted demand in overseas markets (owing to inflation and currency devaluation) will be offset by a healthy pickup in rural demand.

**Focus on EVs:** TVSL aims to ramp up electric vehicle (EV) volumes to 10k units/month by end-Q3FY23 and to 25k units/month by end-Q4. This confident outlook stems from a strong response to 'l-Qube' (current order book of 25k units). Management has planned a series of EV launches over the medium term.

**Limited upside potential; HOLD:** We believe TVSL will continue to beat industry growth as launches in the high-end EV/traditional segments will further revamp the product portfolio. The focus on premiumisation would safeguard margins and any easing of raw material cost offers added cushioning. However, the recent 15% run-up in the stock in past 1 quarter leaves limited upside and hence we recommend HOLD. with a TP of Rs 1,068 for TVSL based on 25x FY24E EPS for the core business (inline with 10-year average) and the addition of Rs 33/sh (consensus value) for TVS Credit.

## Earnings call takeaways

Volumes: TVSL's Q2FY23 sales volume in the domestic two-wheeler market grew 21% YoY (12% for the industry) to 0.72mn units vs. 0.6mn units in Q2FY22. In export markets, the company sold fewer units YoY (0.25mn vs. 0.27mn in the year-ago quarter) due to the economic slowdown and higher inflation in some key geographies. However, the industry declined 14% vs. a 7% dip for the company.

Premium motorcycle sales improved further over Q1FY23, but demand could not be fully met as semiconductor availability remained constrained. Management expects to meet the demand for high-end products in Q3FY23 as chip supply constraints likely ease.

- Realisations: In Q2FY23, the factors contributing to realisation gains were an overall price increase of 1%, exchange benefit of 0.4% and material cost reduction. The company has hiked prices by another 1.1% from October onwards in the domestic market. Management expects commodity prices to moderate in Q3/Q4FY23, further adding to gross margins.
- Margin outlook: Rising premiumisation trends and continued cost reduction initiatives are guided to fuel growth in EBITDA in both absolute and percentage terms over the medium term.
- Electric vehicles: TVSL was able to deliver 16k EVs in Q2. The company delivered 8k units in October and expects to sell 10k units in November. The target is to reach 25k units/month by Mar'23.
- **Inventory management:** For effective working capital management, the company maintains lean stock at 25-30 days.
- Capacity expansion and capex: TVSL's current annual electric two-wheeler manufacturing capacity stands at 0.12mn units, and management expects this to increase to 0.3mn units in FY24. Capex is guided at Rs 7.5bn in FY23, predominantly in the EV space.

# Valuation methodology

We believe TVSL will continue to beat industry growth as launches in the high-end EV and traditional internal combustion segments will further revamp the product portfolio. The company's focus on premiumisation would safeguard margins and any easing of raw material cost offers added cushioning. However, the recent 15% run-up in the stock in the past 1 quarter prices in these positives and leaves limited upside; we thus recommend HOLD. Our TP of Rs 1,068 is set at 25x FY24E EPS for the core business (inline with 10 year aveage with the addition of Rs 33/sh (consensus value) for TVS Credit.

## Key risks

Key upside risks to our estimates are:

faster economic pickup than anticipated, propelling demand

Key downside risks are:

- slower demand revival in domestic markets, and
- commodity prices staying elevated.
