## Commentary

- Nifty traded on a subdued note on the weekly expiry, forming a doji candle on the daily chart. Despite the lack of strong directional movement, the positive bias persisted as the index closed with a modest gain of 67 points, while Bank Nifty ended marginally lower by 47 points.
- Most sectoral indices traded sideways during the session, though the Auto index (+1.37%) showed signs of regaining momentum.
- The 26000 level continues to act as a sturdy resistance for Nifty. A decisive breakout above the same could trigger short covering, potentially leading to a fresh phase of bullish momentum.
